# **PCB CONTACT FINGERS 2900**

Surface mount spring contacts are now available in different sizes, ranging from 1.7mm to 7.25mm

The contact fingers are applicable to make vertical or horizontal contact. You can order the fingers in different sizes and are designed for whipping and sliding applications. The use of the contact fingers are as example for shielding, grounding and general electrical connections applications and ideal to use for surface mount PCB's. The fingers are also known as Grounding / EMI/ RFI contacts, spring or Shield Finger.

The PCB contacts are ideal for automatic placement and can be delivered on Tape and Reel packing. When the contacts are mounted in a row they can provide excellent RFI shielding connection for metal doors or other cabinet enclosures. However, we can better advise our beryllium copper fingerstrips.
